

Σ

Synth Benchmark Pipeline – Complete Map

The forward spine, the three reference feeds, and the four feedback loops that close the system

$\rightarrow$ spine – forward dataflow, Stage 1 $\rightarrow$ 8 $\rightarrow$ GO $\dashrightarrow$ R1–R3 – frozen references fed forward (ground truth, S_0 , manifest) $\dashrightarrow$ L1–L5 – loops: L1 agent iterate (inside 4) · L2 replay · L3 variance flag · L4 NO-GO re-dispatch · L5 human review substrate underpins every stage
